

### Own your Assets

- Overfill Protection
- Stay informed of tank levels and leak detection
- Simple to interface with RTUs and PLCs
- Low capital investment with a quick ROI

### Monitor Features

- Monitor two tanks with one unit
- 1st channel sensor included
- Easy installation, no special tools required
- Field programmable with High/Low set points
- Jr. & Sr. gauge sensors for LPG tanks
- Compatible with float gauges in Fuel Oil & Ammonia tanks
- 2 line x 16 character LCD
- 5 buttons for setting parameters
- RS232 interface for programming & saving parameters to PC
- RS232 to RTU to directly retrieve product level
- Alarm Relay Form "C", 10A dry contacts each channel
- Analog output 0-5vDC per channel
- Optional 4-20 mA output per channel
- Optional wireless link from monitor to tank
- Operating temperature (-20 F to 140 F)
- Includes 120v AC power supply
- Robust 4.5" x 6.5" x 3" weatherproof enclosure
- Compatible for use with other 4-20mA sensors & signals
