LevelCon

Product Name	**Submersible Pressure Sensor**
Product Description	This all purpose submersible liquid level transmitter, can be used to measure fluid levels, well depth, groundwater level and so on, Common accuracy is 0.5%FS, high and can be customized according to customer's' requirement. This hardy stainless steel pressure sensor is ideal for non-hazardous fluids but can also withstand the corrosive properties of many types of fuels.

Specifications

Signal Output	Modbus RS485, 4~20mA, 0~5VDC, 0~10VDC
Hazardous Rating	C1D1 compliant with approved IS barrier
Supply Voltage	0-5VDC, 0-24VDC
Accuracy	0.3%FS; 0.5%FS
Medium Compatibility	Water, Lubes and diesels
Environmental Protection	Waterproof IP68
Operating Temperature	0-80 Degrees Celsius
Sensing Technology	Large stainless steel diaphragm
