

Own your Assets

Organizations across the globe are utilizing digital video surveillance to monitor their sites to protect their assets and to ensure safety protocols are followed. This is more important than ever considering world events.

The DS200 simplifies deployment by providing a flexible topography and an scalable feature set. Not only can the DS200 monitor switches, sensors (i.e. tank levels), and motion detectors, it serves as a Digital Video Recording system which interfaces with our secure LevelCon cloud. Able to integrate virtually any wired or wireless IP camera, the robust system provides unprecedented performance and flexibility to meet your needs.

Typical Applications

- Remote site security: 24/7 video surveillance with optional 4G LTE cellular radio support. Local internet connectivity is not required.
- Large facility monitoring: scalable deployment allows for any size facility with a flexible installation schedule.
- Customizable event marking: mark video clips of motion, unauthorized filling, tank overflow, fuel/fluid spillage and more.
- Mobile video surveillance: school bus, public transit, law enforcement.

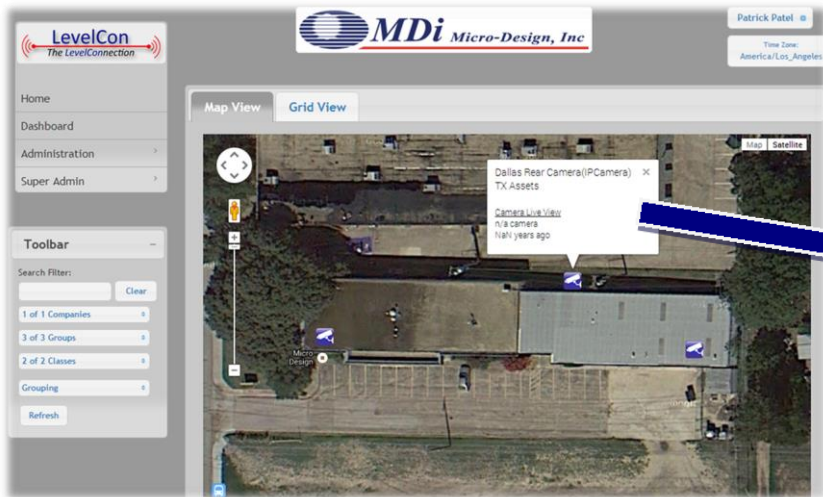

Features

-  4x 12 Bit Analog Inputs interfacing with virtually any sensor
-  3x Digital Inputs for custom alarms and status
-  4x Digital Outputs for local alerts and control
-  RS232/RS485/UART Modbus support
-  GSM/CDMA   802.11g WiFi
-  GPS enabled for mobile asset tracking
-  24/7 access to data on LevelCon Cloud or local SCADA
