CS100 LTE Camera DVR System — Reliable Eyes in the Field

The CS100 LTE Camera DVR System delivers crystal-clear visual monitoring and secure data recording for remote or hard-to-reach assets. Built for industrial environments, the CS100 combines a rugged high-definition camera with an integrated LTE-connected DVR, ensuring critical footage is captured, stored, and accessible from anywhere.

Designed for reliability in the field, the CS100 provides real-time visibility in locations where traditional surveillance systems fall short. With intelligent power management, solid-state storage, and a weather-resistant housing, it operates continuously through harsh conditions without the need for local infrastructure.

Typical Applications

- Remote site security: 24/7 video surveillance with optional 4G LTE cellular radio support. Local internet connectivity is not required.
- Large facility monitoring: scalable deployment allows for any size facility with a flexible installation schedule.
- Customizable event marking: mark video clips of motion, unauthorized filling, tank overflow, fuel/fluid spillage and more.
- Mobile video surveillance: school bus, public transit, law enforcement.

Features

- **LTE Connected DVR** – Stream and retrieve footage remotely with secure cellular connectivity.
- **High-Definition Imaging** – Capture clear, actionable visuals day or night.
- **Rugged Industrial Build** – Engineered for outdoor, remote, and hazardous environments.
- **Edge Recording** – Solid-state onboard DVR guarantees footage is stored even when connectivity is limited.
- **Flexible Mounting Options** – Ideal for tanks, well sites, remote yards, and critical infrastructure.
- **Low-Maintenance Operation** – Designed for long-term deployments where reliability is a must.
- **1, 2, 3 Camera configuration**

Advanced Surveillance & Monitoring System

Sample Customer Views

The image displays two customer views of the LevelCon CS100 Security Gateway system. The top left view shows a map of a facility with a camera icon labeled 'Dallas Rear Camera(IPCamera) X TX Assets'. The top right view shows a live video feed of a building's exterior. The bottom view shows a live video feed of a fuel storage tank at night, with a 'Triggered Events' list on the right side.

Customer View 1 (Top Left): Shows a map view of a facility with a camera icon labeled 'Dallas Rear Camera(IPCamera) X TX Assets'. The interface includes a toolbar, search filters, and a date picker for May 2014.

Customer View 2 (Top Right): Shows a live video feed of a building's exterior. The interface includes 'Live View' and 'Recordings' tabs, a date picker for May 2014, and a 'Triggered Events' list.

Customer View 3 (Bottom): Shows a live video feed of a fuel storage tank at night. The interface includes 'Live View' and 'Recordings' tabs, a date picker for April 2014, and a 'Triggered Events' list.
